ACHMAD NABIL AFGAREZA

Malang, East Java, Indonesia | +62 813-3216-0514 | nabilafgareza12@gmail.com | linkedin.com/in/nabilfgrza

PROFESSIONAL SUMMARY

Full-Stack Web Developer specializing in Front-End Architecture and Informatics Engineering student at State Polytechnic of Malang. Skilled in engineering modular, cross-browser compatible user interfaces with Next.js, React.js, TypeScript, and Tailwind CSS, complemented by solid back-end proficiency in Laravel, Filament v4, RESTful APIs, and relational databases (PostgreSQL, MySQL). Dedicated to clean code practices, UI/UX translation accuracy, and end-to-end web performance optimization within agile development teams.

TECHNICAL SKILLS

- **Programming & Markup Languages:** JavaScript, TypeScript, HTML5, CSS3, Sass, PHP
- **Frameworks & Libraries:** Laravel, Filament v4, Next.js, React.js, Tailwind CSS, Express.js
- **Databases:** PostgreSQL, MySQL, MongoDB
- **DevOps & Developer Tools:** Git, GitHub, VS Code, DBeaver, Laragon, Postman

WORK EXPERIENCE

Indonesian Data Annotation Contributor | Outlier (Freelance) ~ San Francisco, US (Remote)

Apr 2025 – Jul 2026

- Evaluated AI language model effectiveness against comprehensive key performance indicators and strict linguistic benchmarks.
- Provided detailed, actionable technical and linguistic feedback to enhance AI model comprehension, reasoning, and factual precision.
- Trained and fine-tuned conversational speech outputs to deliver natural, human-like Indonesian interactions across complex domain prompts.
- Performed systematic data annotation and alignment tasks adhering to stringent quality and safety standards.

Front End Web Developer | Illiyin Studio (Internship) ~ Malang, East Java, Indonesia (On-site)

Nov 2023 – Apr 2024

- Engineered responsive, accessible front-end interfaces utilizing Next.js, JavaScript, and modern CSS/Tailwind workflows.
- Conducted rigorous tasks analysis and technical problem solving, achieving top competency scores (Tasks Analysis: 93/100, Problem Solving: 95/100, Disciplinary: 97/100).
- Collaborated closely within cross-functional teams with UI/UX designers and back-end engineers to implement pixel-perfect user flows.
- Maintained thorough code quality, modular component architectures, and reliable cross-browser compatibility across client digital solutions.

KEY PROJECTS

SKN Superapp – HRIS & AI Face Recognition Attendance | Laravel 12, Livewire 3, PostgreSQL, FastAPI, Docker (2026)

- As Full-Stack Developer & AI Integrator, built an HRIS MVP for PT Surya Komponen Nusantara to manage ±1,200 multi-shift manufacturing and office employees, with role-based workspaces (Staff, HRD, Finance) and Chart.js dashboards.
- Developed a stateless face recognition microservice (FastAPI, InsightFace) containerized with Docker, combined with GPS geofencing to prevent location spoofing and proxy check-ins.
- Implemented an automated payroll pipeline (overtime, late penalties, BPJS/tax deductions, PDF payslips) backed by Cloudflare R2 object storage and Neon Serverless PostgreSQL.

JayaCamp – Outdoor Equipment Rental System | Laravel 12, Filament v4, MySQL, Tailwind CSS (2026, Team PBL)

- Built a rental platform for Politeknik Negeri Malang's Project-Based Learning that digitizes stock allocation, reservations, and returns of outdoor gear, with a Tailwind CSS and Blade customer catalog.
- Constructed an admin panel with Filament v4 for real-time inventory management, pricing tiers, and revenue tracking.
- Designed relational MySQL schemas and database transactions to prevent double-booking across overlapping rental dates and ensure integrity for order placements and returns.

GoForUmrah – Your Umrah Partner | Next.js, JavaScript, Tailwind CSS, Figma (2023 – 2024, Illiyin Studio)

- Translated Figma design systems into responsive, accessible Next.js pages for a platform that simplifies discovering and booking Umrah travel packages.
- Structured reusable Tailwind CSS components and integrated package listings, detailed itineraries, and booking inquiry workflows.

More projects can be found on my GitHub:: Github Repositories

EDUCATION

State Polytechnic of Malang (Politeknik Negeri Malang)

Bachelor of Applied Science (D4) in Informatics Engineering | Expected Graduation: 2028

- GPA: Current GPA, 3.95 | Relevant Coursework: Data Structures, Database Systems, Web Programming, Software Engineering, Computer Networks

SMK Telkom Malang

Vocational High School | Jul 2021 – Jun 2024

- Specialized in Software Engineering (RPL). Built core competencies in frontend fundamentals, component-driven development with React.js, modern CSS architectures with Tailwind CSS, and collaborative version control.

HONORS & ACHIEVEMENTS

- Certificate of Internship – Front End Web Developer, Illiyin Studio (Evaluation: Tasks Analysis 93, Problem Solving 95, Disciplinary 97)
- 1st Place PKM GFT Category – Malang State Polytechnic HMTI Intercomp (Oct 2024)
- 3rd Place National Web Hackathon (Best Performance Category) – PlayIt (Oct 2026)
